TALKSWITCH  
**COMPETITIVE  
 ADVANTAGE SERIES**

**FOCUS ON BIZFON 680**

The Bizfon 680 is a modular PBX system for 6 to 32 users. It provides connections to the PSTN only. VoIP is not an option.

Bizfon 680	
CO Lines	6 to 24
Local Extensions	8 to 32
VoIP Trunks	NA

The TalkSwitch 24-CA, 48-CA and 48-CVA systems are ultra-compact PBXs with built-in voicemail and auto attendants for small and multi-location businesses. The 24-CA is TalkSwitch's entry-level system for businesses with up to 4 users. The 48-CA and 48-CVA are expandable to 32 users over the LAN. The SIP-based 48-CVA allows calls to be made over the PSTN or IP networks using affordable analog phone sets. The 48-CA is designed with a migration path to VoIP.

TalkSwitch System

	24-CA	48-CA	48-CVA
CO Lines	2	4 to 16	4 to 16
Local Extensions	4	8 to 32	8 to 32
Remote Extensions	8	8 to 32	8 to 32
VoIP Trunks	NA	NA	4 to 16

System modes	yes	yes

#### **KEY TALKSWITCH ADVANTAGES**

**Local programming is via Bizfon phone set only.**

- 48-CA and 48-CVA are programmed by PC using built-in serial, USB or LAN connections. Systems can also be locally or remotely configured over IP. This is a more flexible, convenient and efficient approach for system administrators.
- The upcoming TalkSwitch Network Management application will allow systems at multiple locations to be configured simultaneously.

**Many call routing settings can only be configured and changed by Bizfon staff. Support calls are charged unless a 1 year contract (\$199) is purchased. (60 days free support is included)**

- TalkSwitch systems are designed to be easy to configure for non-technical staff. Free user-friendly PC software is included. 1 year of free professional support is available with each system at no extra charge.

**Bizfon bundles “virtual extensions” (and additional voicemail capacity) as an option for \$299.**

- Experience shows that most businesses can benefit from using “remote extensions”. That is why all TalkSwitch systems include up to 32 remote extensions at no additional charge. Voicemail memory upgrades are available from \$100.

**Bizfon 680 cannot be VoIP enabled. An external voice gateway can be used.**

- 48-CA can be upgraded to SIP-based VoIP capability with the addition of a \$400 module. The existing equipment investment is maintained.
- Business can reduce long distance calling costs between locations and easily connect to Internet telephone service providers. TalkSwitch, by using an integrated gateway, ensures that all PSTN (CO) ports remain available.

**PRICING**

TalkSwitch systems are available starting from \$695 (24-CA). The following table compares the 48-CA with a comparably sized Bizfon 680. A minimum of 4 VoIP trunk interfaces can be added to the TalkSwitch system for \$400. The 680 cannot be upgraded to include VoIP capability. Phone sets are not included.

TalkSwitch 48-CA (msrp)		Bizfon 680 (street)	
4 lines, 8 local ext., 8 remote ext.	\$1495.	6 lines, 8 local ext., 14 virtual ext.	\$1691
8 lines, 16 local ext., 16 remote ext.	\$2990.	12 lines, 16 local ext., 14 virtual ext.	\$2699
12 lines, 24 local ext., 24 remote ext.	\$4485.	18 lines, 24 local ext., 14 virtual ext.	\$3799

Note: Bizfon 680 is equipped with the optional Voice Vault card in order to achieve parity with the TalkSwitch system.
